1-1 Reverse Polarity Configuration

DURING REVERSE POLARITY CONFIGURATION, THE HD KNEE ARRAY COMBINER BOARD IS EXPOSED. **USE ESD SAFETY PRECAUTIONS**

1-1-1 Tools Required

1ea Philips Screwdriver

1-1-2 Configuration Time

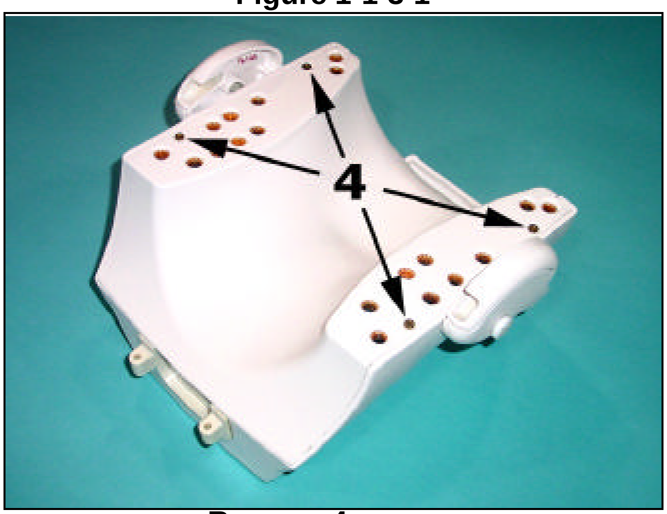
15 to 20 minutes

1-1-3 Configuration Procedure

If required, follow these steps to configure the HD Knee Array for reverse polarity.

1. Remove the HD Knee Array coil cable as detailed in **External Cable Replacement**.
2. Separate the anterior and posterior coil sections.
3. Using the phillips screw driver, remove 4 screws from the anterior coil section as illustrated in Figure 1-1-3-1.
4. Remove the anterior coil section cover as illustrated in Figure 1-1-3-2.

Figure 1-1-3-1



Remove 4 screws

Remove Cover

5. Locate the two *Trap/Combiner Coaxial Cables*; they are marked *1* an *2*, and are connected to the *Combiner Printed Circuit Board* at locations *Port 1* and *Port 2* respectively. Reference Figure 1-1-3-3.
6. Disconnect both *Trap/Combiner Coaxial Cables.* Connect cable *1* to *Port 2* and connect cable *2* to *Port 1*. Reference Figure 1-1-3-4 and Table 1-1-3.

POLARITY CABLE CONFIGURATION - TABLE 1-1-3

Trap/Combiner Coaxial Cable	For Normal Polarity	For Reverse Polarity
Number 1	Connect to Port 1	Connect to Port 2
Number 2	Connect to Port 2	Connect to Port 1

7. Reinstall the anterior coil section cover using the 4 associated phillips head screws.
8. Reinstall the HD Knee Array coil cable as detailed in **External Cable Replacement**.
9. Check whether the coil images are ok.
