FMI	**ADMINISTRATIVE INFORMATION**	**FMI No: 25356**

FMI Title: HP80 (Varian Tube) SmartID Rev.2

FMI TYPE	CHARGE CODES	IMPLEMENTATION DATES
☐ Mandatory Safety	GEMS - AM:	Issue Date:
☑ Mandatory	GEMS - E:	
☐ Mandatory on Request	GEMS - A:	Close Date:

☑ **Staged FMI** — **Customer List** provided by FMI Administration. If you identify additional units within effectivity range, but they are not shown on the customer list, contact FMI Administration in your Pole.

☑ **Parts** and any special tools are furnished automatically. To address shortages and ordering exceptions, contact FMI Administration in your Pole.

☐ **Parts Ordering**: GEMS - Americas, Contact your Region logistics coordinator
GEMS - Europe, Order FMI kits from GPO/EPL Buc
GEMS - Asia, Contact your region logistics coordinator

☐ **No Parts** are required to complete this FMI.

☐ **Batch with** ______________________

To minimize costs, combine implementation of this FMI with the FMI's listed for all customers where the effectivity is the same (Please see your customer lists).

☐ **Non-Staged** — **No Customer List is provided**. Each service location must identify affected units, and place part orders as indicated in the Special Instructions.

Purpose

The purpose of this document is to upgrade all LightSpeed Pro16 80kW sites with new Rev.2 Smart ID circuit board.

The Smart ID circuit board kit is provided in this FMI Kit for the Performix Pro tube. If you do not have a Smart ID kit, or the circuit board is not functioning properly please contact:

Jim Dodge, Lead Integrator, Generator and X-Ray Tube, FCT Source Subsystem– cell # (262) 424-2848, e-mail: James.Dodge@med.ge.com

Jim will provide this part to you ASAP.

Furnished Materials

Qty	Part #	Description
1	5115466-2	FMI for 12 MHz Smart ID Bd - VARIAN
1	5131406-100	FMI Doc.

Tool Required

Qty	Part #	Description	SW Version
1	5131406-100	FMI Doc.	N/A

Personnel Requirements

3 hours labor and 1 hours of travel

Procedure

This FMI includes the following procedures:

- · Smart ID Circuit Board Installation
- · Smart ID Circuit Board Replacement

Smart ID Circuit Board Installation (LightSpeed Pro 16 80kW – Performix Pro Tube)

The following instructions detail the field process to provide SmartID functionality for Performix Pro (D3634T) X-Ray tubes.

Preliminary Notes:

Refer to drawing below as needed.

Instruction:

1) **Remove power to the gantry using lockout / tagout.**
2) Remove right side gantry cover
3) Rotate gantry such that the x-ray tube is at the 3 o'clock position

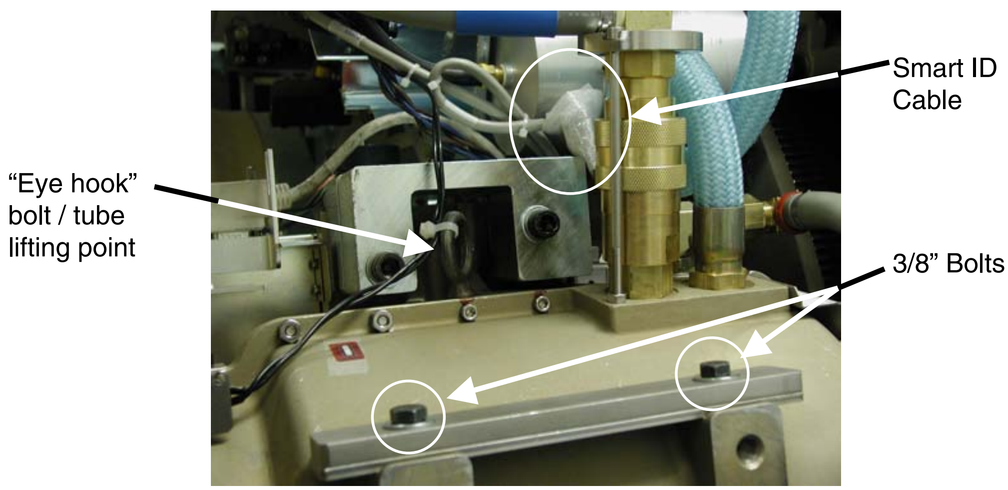

Fig 1 – Performix Pro Config without Smart ID

4) Remove the balance weight 3/8" mounting bolts (qty 2) and washers on the topside of the tube casing.
5) To compensate for new assembly weight remove quantity one 3/8" thick balance weight or quantity three 2mm thick balance weights. The balance weights vary on each tube.
6) Place SmartID board assembly over the remaining tube weights and reinstall the 3/8 bolts and washers using a drop of blue loctite (242) on the bolt.
7) Torque the two 3/8" bolts to 47 N-m [35 lb-ft / 420 lb-in / 484 kg-cm].

8) Make sure these treads are not stripped or cross-threaded. Report any tread issues to Alex Sender or Jim Dodge.

   Jim Dodge, Lead Integrator, Generator and X-Ray Tube, FCT Source Subsystem– cell # (262) 424-2848, e-mail: James.Dodge@med.ge.com

   Alex Sender, Lead Service Integrator, FCT. Cell # (414) 807-3187, e-mail Arkadiusz.Sender@med.ge.com

9) Connect Smart ID cable to Smart ID board. You will find this cable coming from the Jedi Inverter, connector J5, which also connects to the heat exchanger power i/f board. The Smart ID cable is the disconnected portion of the Y cable. See figure 1 if necessary.

10) Reattach tie-wrap for tube thermal wires to tube lifting hook and reattach any other tie-wraps you may have cut during the procedure.

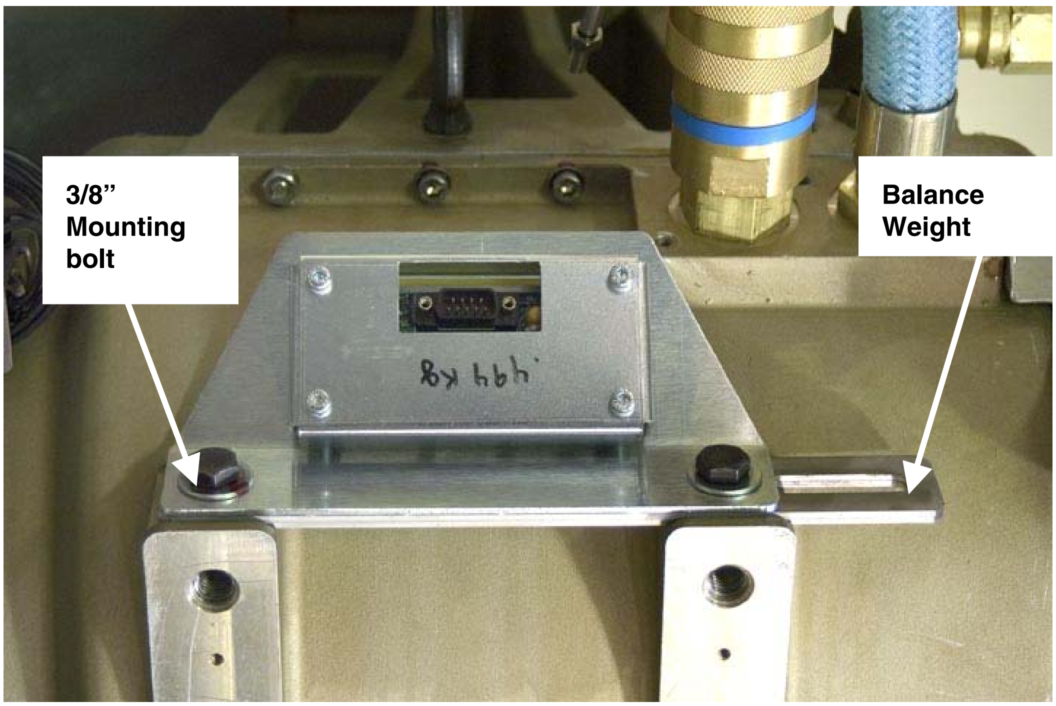

Fig 2 – Mock drawing of Smart ID installation points on Performix Pro tube

Smart ID Circuit Board Replacement (LightSpeed Pro 16 80kW – Performix Pro Tube)

The following instructions detail the field process to provide SmartID functionality for Performix Pro (D3634T) X-Ray tubes.

Preliminary Notes:

Refer to drawing below as needed.

Instruction:

1) **Remove power to the gantry using lockout / tagout**
2) Remove right side gantry cover.
3) Rotate gantry such that the x-ray tube is at the 3 o'clock position.
4) Remove the two tube balance weight/Smart ID 3/8" mounting bolts and washers on the topside of the tube casing, disconnect the Smart ID cable and remove the current Smart ID assembly (5115466). Keep hardware – you will reuse it.
5) Place new SmartID assembly 5115466-2 over the tube weights and reinstall the 3/8" bolts/ washers using a drop of blue loctite (242) on the bolt threads.
6) Torque the two 3/8" bolts to 47 N-m [35 lb-ft / 420 lb-in / 484 kg-cm].
7) Make sure these treads are not stripped or cross-threaded. Report any tread issues to Alex Sender or Jim Dodge.

   Jim Dodge, Lead Integrator, Generator and X-Ray Tube, FCT Source Subsystem– cell # (262) 424-2848, e-mail: James.Dodge@med.ge.com

   Alex Sender, Lead Service Integrator, FCT. Cell # (414) 807-3187, e-mail Arkadiusz.Sender@med.ge.com
8) Connect Smart ID cable to Smart ID board. You will find this cable coming from the Jedi Inverter, connector J5, which also connects to the heat exchanger power i/f board. The Smart ID cable is the disconnected portion of the Y cable. See figure 1 if necessary
9) Reattach tie-wrap for tube thermal wires to tube lifting hook and reattach any other tie-wraps you may have cut during the procedure.

Finishing Up

Perform the Gantry Rotation Safety check, found in the System Service Manual. If you cannot find the procedure, click on the link from the Tube Change procedure, as the manual may have a bug where it may not be displayed.

Also perform an application scan to ensure proper system operation before turning the system over to the customer.
