ADVANCED IMAGING SYSTEMS — DEDICATED IMAGING SOLUTIONS

Service Request Number ____________ Site Name: ______________________ Month: ____________

Procedure 15x - 23x PM Checklist

Print Form | Reset Form

PM Checklist

	OK	Cleaned	Adjusted	Needs Correction	N\A
Talk With Technologist About System Operation					
Look at Image Quality of Previous Exams					
Check and Set System Date and Time					

SAFETY AND REGULATORY

	OK	Cleaned	Adjusted	Needs Correction	N\A
SYSTEM - Check Gating Cable/ Respiratory Bellows / PG Probe					
SYSTEM - Check Pneumatic Patient Alert System					
SYSTEM - Check Emergency Release of Cradle and Patient Transport					
SYSTEM - Check Patient Transport Casters and Arm board Set Screws					
MAGNET - Check Magnet Bore for Metal Objects and Remove					
MAGNET - Test Magnet Emergency Rundown (Test Battery, Htr LED)					
MAGNET - Check for Condensation or Leaks on Top and Around Magnet					
MAGNET - Record Cryostat Pressure and Flow Rates He Level 1 ________ Pressure ________					
MAGNET - Compressor Pressure Pressure ________					
MAGNET - Coldhead and Magnet Temps Coldhead_Ru0 ________ Recon_Si410 ________ Recon_Ru0 ________ Shield_Si410 ________ Water Temp ________ Water flow ________					

Clean, Test and Check

	OK	Cleaned	Adjusted	Needs Correction	N\A
Check Correlated Noise (RF Integrity / RF Door Seal, top hatch, clean, Check)					
Clean Light-Weight Cradle Wheels					
Check Table Functionality (Clutch, Alignment, Undock)					
Check Body Chiller Temp and Fluid — Water Temp and flow ______________					
Clean Patient Blower Filter					
Clean All Cabinet Filters					
Clean Console area (Vacuum PC, Octane, or GOC)					

Semi-Annual or First PM Safety Checks

Month: ______________

	OK	Cleaned	Adjusted	Needs Correction	N\A
Test Emergency off Buttons					
Test Emergency Stop Buttons					
Inspect all System Cables and Connections for Tightness and Security					
Check Condition and Placement of Warning Labels					
Check Condition and Placement of 0.5 mT Exclusion Warnings					
Check Magnet Exhaust Vent and Vent Glass					
Clean Water Chiller Filter - If filter is really dirty then need to clean on next PM and note status below					
Tip Seal and Solenoid Valve Replacement (TwinSpeed)					
Change Out All Patient Cradle Wheels					
Inspect and Clean Erbtec Interior					
Check PDU power and cables					
Check gradient cables					
Check gradient filters and PHPS					

ADVANCED IMAGING SYSTEMS / DEDICATED IMAGING SOLUTIONS

Service Request Number ______ Site Name: ______ Month: ______
