

3–7 OUTPUT WIRING DIAGRAM

PD1
COMPACT POWER DISTRIBUTION UNIT

46–317099P8 through P16

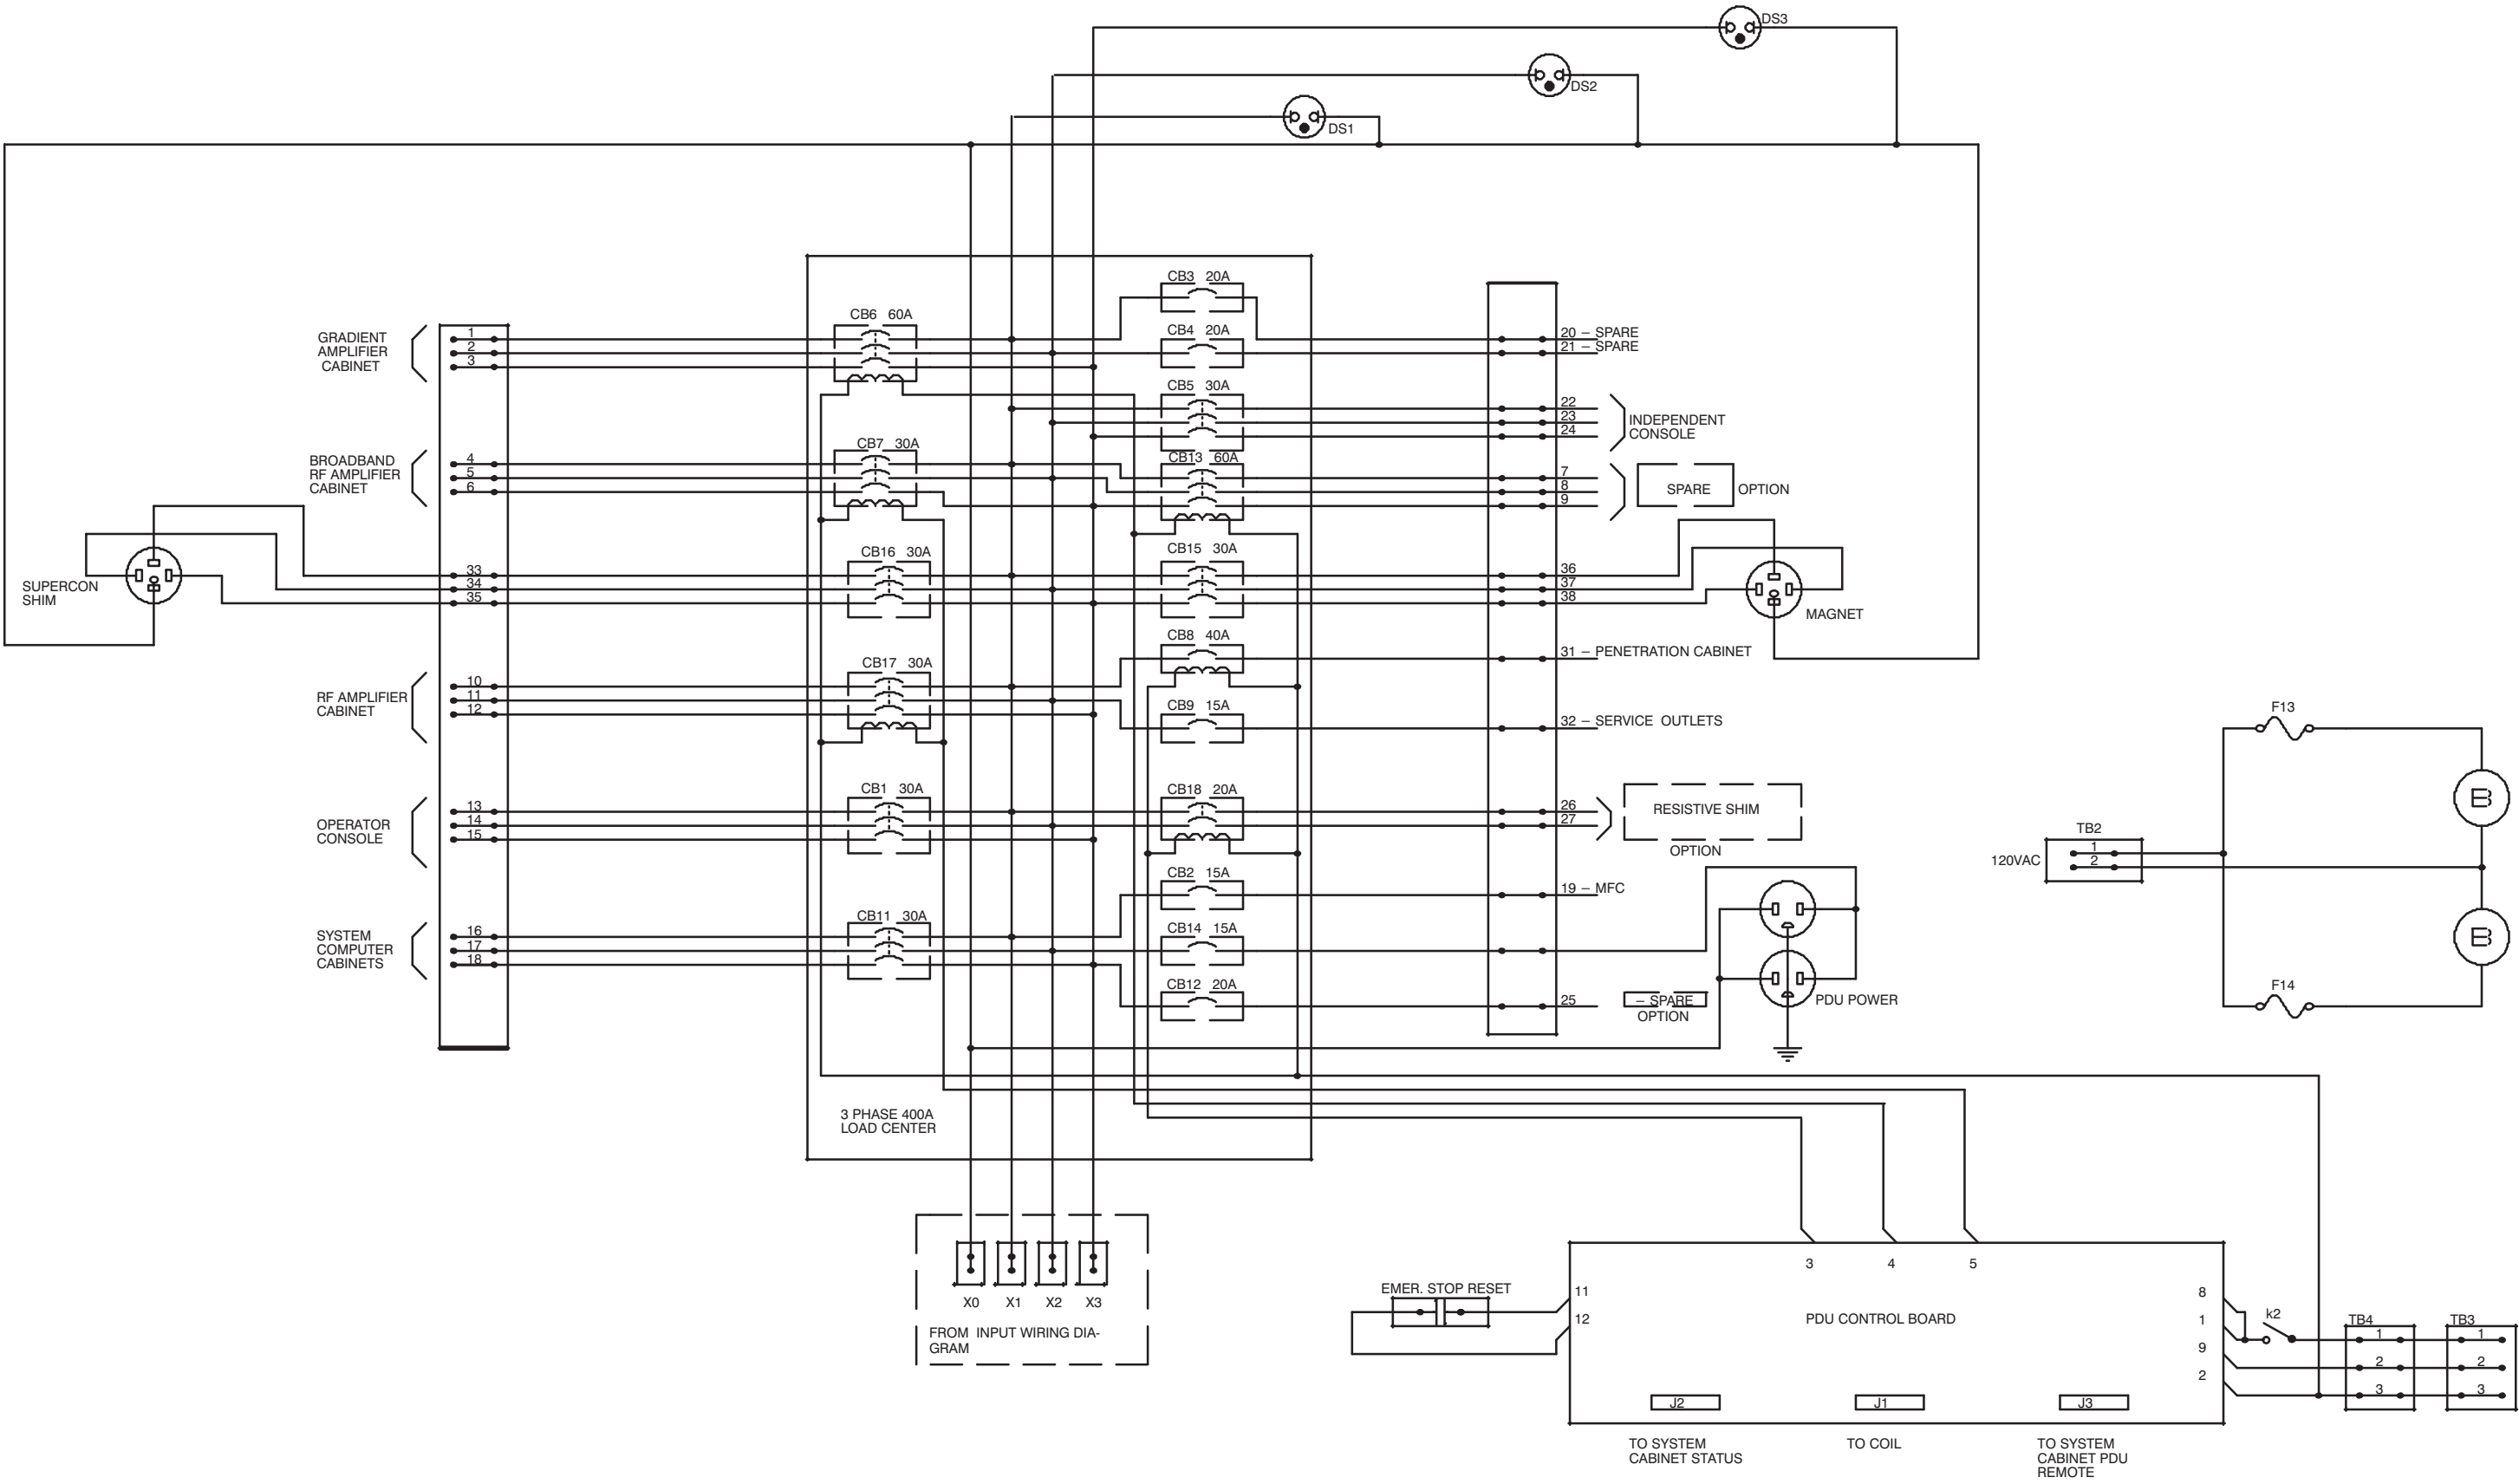

Description

The Compact Power Distribution Unit (PDU) serves as the primary interface to facility power. It converts the 3 ϕ input line to either 208VAC (3 ϕ) or 120VAC (1 ϕ) as required by each subsystem cabinet. It also provides protection against high voltage spikes and high frequency noise. The Compact PDU does **not** provide powerline distortion or frequency shift protection.
