

Description - The following conventions are used in the service procedures:

1- Conventions

- "TYPEWRITER" typeface indicates alphanumeric video terminal, or printer display.
- Bold type within text indicates what you type (e.g., genesis@ oc0:**mrswrev**).
- Some variable computer outputs and user inputs are represented by text in <angle brackets> (e.g., <filename>). User inputs of this type are in **<boldface>**.
- The pressing of a button on any hardware is represented by all capital letters (e.g., EMERGENCY OFF).
- < > indicates a key on an alphanumeric keyboard (e.g., <Ctrl><C>, or <Enter>).
- [] indicates a screen "button" to click on (e.g., Use [**Start Looping**] to begin test execution).
- The names of windows, and some items in certain windows appear in Cap Initial, lower-case text; however, items that you select via the mouse are in boldface (e.g., In the Service Desktop Manager window, select [**Cal/Checks**], then [**LVShim**]. OR: In the Scanning Range window, at Slice Thickness, enter [**1.5**].
- Since most mouse actions involve a click of the left button, the use of *click* in text means that you should "point and click the left button." If you are to use the middle button, or the right button, we say "right click on," or "middle click on."
