INTRODUCTION TO FIELD REPLACEABLE UNIT (FRU)

This direction is a guide to the FRU's for HDxt, HDx, HDi, and Vibrant.

Parts designated as a FRU are critical to maintain the safety and/or functionality of the system. FRU's are available on a Priority 1 basis from Service Parts Operation.

As a reference aid, the FRU's are listed under an upper-level part number where they are used. In most cases the upper-level part number is not a FRU. In some cases the parts listed under an upper-level assembly may have been nested in intermediate sub-assemblies which are not shown.

Where possible, FRU's which are part of Option Catalogs are shown under the area where they would be installed, rather than being listed in the Coils or Options Sections (SEE TABLE OF CONTENTS).
