Description - This is the functional check of the Indigo video camera.

1- INDYCAM VIDEO CAMERA AND VIDEO CONFERENCING FUNTIONAL CHECK

This section explains how to check if the IndyCam video camera and Video Conferencing is functioning properly. To set up the video follow these steps.

1. Choose "Video Panels" from the Find menu in Toolchest. See illustration L1. Double-click the video panel icon. Click on authoring, see illustration L3.

AUTHORING
ILLUSTRATION L3

2. The video panel appears. Choose "Live Video Output" from the Utilities menu. See illustration L2. A Live Video Output button appears. You can drag this button anywhere on the screen. After you position the button, a rectangle shaped border appears in the upper left corner of the screen. Everything inside of this rectangle is live video output.

VIDEO PANEL

3. Select the Video Conferencing option by clicking on the icon in the extreme upper left hand corner of the MR screen. Verify that the telephone icon appears to the right of the video conferencing icon (see Illustration L1 in Step 1).
4. Click on the telephone icon as if you were making a video conference call. Verify that the call window appears (see Illustration L2 in Step 2).
5. Select "authoring" from the call window.
6. Verify that camera image on authoring white board appears.
7. If image does not appear, select Tools-Video control panel. Device setting should be as indicated in Illustration L3 in Step 1. If necessary, refer to the Indigo Video for Indigo IMPACT owners guide for troubleshooting the installation.

REVISION HISTORY

REV	DATE	AUTHOR	PRIMARY REASONS FOR CHANGE
0	July 14, 1998	J. Saperstein	Initial conversion from Toolbook to Word.
