REVISION HISTORY3

1- INTRODUCTION

The Fast Receiver Module Diagnostic tests are separated into Analog and Digital sections; see Illustration 1-1 for a block diagram of the Fast Receiver and associated hardware.

FAST RECEIVER HARDWARE CONFIGURATION
ILLUSTRATION 1-1

The analog portions of the Fast Receiver modules are tested by the TPS/ISE Board Level Tests. Refer to the TPS/ISE Board Level Tests procedure.

The digital portions of the Fast Receiver are tested with the Fast Receiver-CERD XD Bus test, which is part of the TPS/ISE Datapath test set. Refer to the TPS/ISE Data Path Tests procedure.

2- STARTING FAST RECEIVER DIAGNOSTICS

2-1 Analog Diagnostics

To start the Board Level test, select the Service Desktop, then **[Diagnostics]**, **[Diags Main Menu]**, **[Start...]**, **[CERD]**, **[Receiver...]**, **[Fast Rcvr Loopback]**, and finally, **[Run Diags]**.

2-2 Digital Diagnostics

To start the Datapath test, select the Service Desktop, then **[Diagnostics]**, **[Diags Main Menu]**, **[Start...]**, **[Datapath Tests]** (Click on the data bus to the right of Datapath Tests), **[Fast Rcvr- CERD XD Bus]**, and finally, **[Run Diags]**.

REVISION HISTORY

REV	DATE	AUTHOR	PRIMARY REASONS FOR CHANGE
0	May 29, 1998	J. Saperstein	Initial Conversion from Toolbook to Word.
1	Oct. 12, 1999	M. Keber	Changed description section to "Introduction"; corrected diag run button; added correct proprietary heading to title.
2	June 19, 2000	M. Jones	Added "or UCERD" to illustration 1-1 in 3 locations.
