Class M information is Property of GE - For GE Service Personnel Only. Disclosure to Third Parties Prohibited.

Date: September 7, 2006

Subject: CT Service Info DVD Service Note TOC Fix

Effectivity: Rev 10 of DVD-ROM 2360027-300

Details: The hyperlinks in the Table of Contents for Service Notes on the current release of the LightSpeed Family Service Info DVD-ROM (2360027-300, Rev 10) do not function.

Resolution:

The TOC file for Service Notes has been modified, so that the hyperlinks will function correctly. Alternately, the user may choose one of a couple of work-arounds. The solution implemented by the user will depend in part on whether the user has copied the DVD contents to their hard-drive, or they are accessing the contents directly from the physical DVD-ROM.

If the DVD Contents Have Been Copied to a Hard Drive

1. Go to the following directory on the MI&CTSE web server:
http://www.ct.med.ge.com/tech_pubs/2360027/toc/system/
2. "Right click" on the file "servicenotes.htm" (at the bottom of the list), and choose "Save Target As..."
3. In the "Save As" dialog box:
 - a. Browse to the directory in which the DVD contents were copied.
 - b. Select the "toc" directory
 - c. Select the "system" directory
 - d. Click on "Save"
 - e. When the message:
"*<copied DVD directory>\toc\system\servicenotes.htm already exists. Do you want to replace it?*" appears, click "Yes"
4. All hyperlinks in the Service Notes TOC should now work correctly.

NOTE: A "refresh" may be required, to load the newly updated file into memory.

To Access the Service Notes Directly from the DVD

There are two "work-arounds" that can be employed to view the Service Notes directly from the DVD-ROM:

1. Manually enter the path to the Service Note into the browser's address bar. The path will always be:

`<DVD-ROM drive letter>\sn\<Service Note ID>.pdf`

For example, for a DVD-ROM drive designated as "E", and for Service Note #SN06051009a, the path will be: `E:\sn\SN06051009a.pdf`

2. "Explore" the DVD to navigate to the Service Note directory, `sn`, and select the Service Notes manually.

Note: An advantage of viewing Service Notes this way is that the SN will open directly in Adobe Acrobat (or Reader), and the Adobe Advanced Index Search can then be employed.

This technique can also be used if the Service Notes directory (`sn`) has been copied to a hard-drive (or other medium).
